PROFESSIONAL SUMMARY

Motivated AI & Machine Learning enthusiast pursuing B.Tech in Computer Science Engineering (2027) with hands-on experience in Data Analytics, Deep Learning, and Computer Vision. Proficient in building and deploying end-to-end ML models and AI-powered applications. Seeking an AI/ML Engineer or AI/ML Internship role to apply technical expertise and contribute to impactful projects.

EDUCATION

Bachelor of Technology — Computer Science Engineering (CSE)

Shri Shankaracharya Technical University | Expected Graduation: 2027 | Currently Pursuing

TECHNICAL SKILLS

Languages & Libraries

Python • NumPy • Pandas • Matplotlib • Seaborn • Scikit-learn • TensorFlow • Keras

Frameworks & Tools

CNN • OpenCV • YOLO • FastAPI • MongoDB • Git • GitHub • Jupyter Notebook • Render

Concepts & Techniques

Machine Learning • Deep Learning • Computer Vision • Data Preprocessing • EDA • NLP (Groq LLM API) • Object Detection • Real-Time Inference

PROJECTS

AI Study Bot

Conversational AI study assistant with contextual chat history support, built using FastAPI backend and MongoDB for session persistence. Integrated Groq LLM API for intelligent responses and deployed on Render for live access.

Tech: FastAPI, MongoDB, Groq LLM API, Python, Render

GitHub: <https://github.com/AnshuRaj1201/AI-Study-Bot.git>

AI Disease Predictor

ML-based classification model that predicts potential diseases from patient symptoms and medical data, aiding early diagnosis and healthcare decision-making. Implemented with Scikit-learn and trained on structured medical datasets.

Tech: Python, Scikit-learn, Pandas, NumPy, Machine Learning

GitHub: <https://github.com/AnshuRaj1201/Ai-Disease-predictor.git>

Object Detection using YOLO + OpenCV

Real-time object detection system leveraging the YOLO architecture with OpenCV for live camera feed processing. Renders bounding boxes with class labels and confidence scores in real time.

Tech: Python, YOLO, OpenCV, Computer Vision, Deep Learning

GitHub: <https://github.com/AnshuRaj1201/Object-Detection-with-Ai.git>

Data Science Bootcamp Project

Exploratory Data Analysis (EDA) project covering full data pipeline: data cleaning, feature analysis, statistical visualization, and actionable insight generation from real-world datasets.

Tech: Python, Pandas, Seaborn, Matplotlib, EDA

GitHub: <https://github.com/AnshuRaj1201/Data-Science-Bootcamp-Project.git>

CERTIFICATIONS

- DevTown Bootcamp — AI Disease Predictor
- DevTown Bootcamp — Data Analytics
- DevTown Bootcamp — Image Recognition
- DevTown Bootcamp — Object Detection

CORE STRENGTHS

- Problem Solving & Analytical Thinking
- Rapid Learning & Adaptability to New Technologies
- Team Collaboration & Communication
- End-to-End ML Model Development & Deployment
